

DARK MATTER redefines the interfaces between technology, creativity and interaction in order to create space for personal sensory experiences.

DARK MATTER is an exhibition of expansive light installations in a converted factory. The exhibition introduces new technical concepts made visible to the public for the very first time.

A photograph of an art installation. In the center, a tall, vertical structure of numerous thin, glowing tubes emits a warm, orange-red light. People are seen in silhouette, interacting with the installation. The floor is dark, and the overall atmosphere is dramatic and artistic.

Senior Technical Planner (m/f/d)

full-time | on-site

- YOUR TASKS:**
- * Overall technical planning, organization, and management of events, installations, and productions
 - * Creation of technical concepts, lighting plots, rigging plans, and detailed CAD drawings (e.g., Vectorworks)
 - * Responsibility for lighting design, AV systems, and technical integration into venue infrastructure
 - * Planning and implementation of trussing systems, moving lights, projection mapping, and sound systems
 - * Confident use of control protocols such as DMX, Art-Net, and Dante
 - * On-site coordination of technical setup, operation, and dismantling
 - * Supervision of commissioning, operation, and shutdown of technical systems
 - * Advanced troubleshooting and structured fault diagnosis under live-event conditions
 - * Technical leadership and team management, including crew planning
 - * Coordination of subcontractors, technical departments, venues, and clients
 - * Ensuring compliance with legal regulations, safety standards, and risk management requirements
 - * Resource, logistics, and budget planning
 - * Installation and supervision of technical systems for temporary events (concerts, shows, corporate events)

YOU BRING:

- * Degree or vocational training in event technology, technical production, or related field
- * 3+ years of experience in technical planning or project management within live events, exhibitions, or productions
- * Strong technical understanding of lighting systems, control systems, networking infrastructure, and power distribution
- * Solid expertise in lighting control protocols (DMX, Art-Net), AV systems, moving lights, LED technology, and media integration
- * Proven experience in creating professional technical drawings and layouts (CAD, ideally Vectorworks)
- * Experience with electrical planning concepts, load calculations, and safe installation of event technology
- * Cross-disciplinary technical competence (rigging, sound, projection, automation)
- * Leadership skills with the ability to coordinate and motivate technical teams
- * Structured, solution-oriented, and detail-oriented working style
- * Business-fluent German and English
- * High willingness to travel internationally, flexibility, and resilience

WE OFFER:

- * Participation in the ongoing development of art, events and technology in Berlin
- * A highly motivated, international team and a friendly working environment - we stand for open-mindedness and diversity!
- * Independent work, flat hierarchies and the opportunity to contribute your own ideas
- * Regular team events, e.g. BBQ and summer party
- * Urban Sports discounts
- * Attractive benefits in the areas of professional development, wellness, and mobility
